VIVITEC

Cybersecurity Overview

Comprehensive threat monitoring, endpoint protection, and incident response designed for organizations that need enterprise-grade security without enterprise-scale complexity.

> THREAT LANDSCAPE

24/7

Continuous monitoring across your environment. Threats don't work business hours — neither do we.

:: COVERAGE AREAS

Threat Monitoring

Real-time detection and alerting across network, endpoints, and cloud infrastructure.

Endpoint Protection

Next-gen antivirus, EDR, and device management for all workstations and servers.

Vulnerability Management

Regular scanning, risk assessment, and prioritized remediation guidance.

Compliance Support

Policy frameworks and audit-ready documentation for industry standards.

:: DEFENSE IN DEPTH

Network Perimeter

Firewall management, intrusion prevention, and secure remote access.

Identity & Access

MFA enforcement, privileged access management, and authentication policies.

Data Protection

Encryption, DLP, and backup integrity monitoring to prevent data loss.

User Training

Security awareness and phishing simulation to strengthen your human firewall.

:: INCIDENT RESPONSE

< 1 Hour

Average time to incident containment. When something happens, we're already working on it before you notice.
