

AI in Financial Services

Accelerate operations, strengthen compliance, and unlock strategic insights with AI built for the realities of financial services.

Financial institutions face mounting pressure: regulatory complexity, operational inefficiencies, and the need to deliver personalized client experiences at scale. AI offers a path forward — but only when deployed with security, compliance, and operational discipline at the center.

AI-Now Accelerate

Deploy Microsoft Copilot across your organization in weeks, not months.

- Security posture assessment
- Compliance-aligned deployment
- Staff training and adoption support

AI-Now Innovate

Custom AI solutions for unique operational challenges.

- Document processing automation
- Risk analysis workflows
- Client intelligence dashboards

Cybersecurity Services

Protect sensitive financial data as AI expands your attack surface.

- DLP policy configuration
- Threat monitoring and response
- Regulatory compliance frameworks

Managed IT

Infrastructure that supports AI at scale without disruption.

- 24/7 infrastructure monitoring
- Performance optimization
- Strategic planning and roadmapping

Why Vivitec for Financial Services

Compliance-First Approach: We design every AI deployment with regulatory requirements built in, not bolted on afterward.

Operational Discipline: Strategy and implementation under one roof — we don't just advise, we deliver and manage.

Proven Results: We've deployed AI for organizations processing sensitive data daily. Your team gets 10+ hours back per month for client-facing work.
